

# Company Introduction

All information, ideas, concepts, methods and technologies mentioned in this document are trade secrets and/or proprietary information of J. Gordon Consulting Engineers Ltd. and may not be used, duplicated or disclosed, in whole or in part, without express and specific written authorization of J. Gordon Consulting Engineers Ltd.

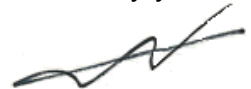

**J. GORDON CONSULTING ENGINEERS LTD.**

Elram Center, 96 Ahuza St., Raanana 43450 Israel  
Tel: 972-9-7430166 | Fax: 972-9-7430162  
office@gordonengineers.com | www.gordonengineers.com

- **J. Gordon Consulting Engineers Ltd. (Gordon)** was founded at 1977 to offer its clients a wide range of **Homeland Security** consulting and engineering services.
- For more than 4 decades **Gordon** provides its clients with high quality, practical, customized, reliable and cost effective security solutions, designed to answer their specific needs in protecting their facilities and business operations.
- **Gordon** is a global organization, comprising a core group of highly competent and experienced security experts and engineers, who have the know-how experience to select, adopt and implement the latest "state of the art" technology solutions tailored to the specific needs of its customers.
- **Gordon** operates extensively in Israel and in 18 countries worldwide. Our security experts and engineers designed protection of: Mega Public Events such as Olympic Games, Africa Cup of Nations, Expo 2015, Expo 2017, security of airports, seaports, oil and gas facilities, water systems and carriers, international borders, nuclear and conventional power stations, mass transit systems: railway, metro, public transportation, military bases, sea shores, compounds, campuses, banks, high rise buildings and others..
- **Gordon** has a significant successful track record of providing high quality Project Management and Security Consulting.
- **Gordon** is independent consulting firm, not associated with any manufacturer of security equipment or any Integrator. Our loyalty is fully devoted to the client therefore, our design reflect always client needs only, and is optimized to achieve the best price per performance for our client
- **Gordon's** security solutions place significant emphasis on the elements of **deterrence** and **prevention**, aiming to deal with threats and risks before they materialize into actual incidents, thus saving lives; eliminating or mitigating damage; and preventing or reducing downtime and recovery costs, while protecting employees, commercial assets, image and reputation
- **Gordon** provides security "**end to end**" consulting services in operational and technological range of security [see the attached "Range of Services" list]

- **Gordon's** uniqueness is expressed by practical experience based on actual events rather than on theoretical assumptions, vast know-how and expertise and successful cooperation between operational and technical capabilities.
- **Gordon** specializes in Integrated Security Systems for indoor and outdoor applications. Gordon has designed all over the world hundreds of security projects which include integration of various security subsystems such as Perimeter Protection, CCTV, Digital Video Recording (DVR), Data Communication Systems, Video Analytics, Access Control, License Plate Recognition (LPR) systems, Screening Devices, Anti-Blast Engineering, Physical Protection and Cyber Security. Most of the systems are operated and controlled by a Command & Control Centers equipped with an advanced Security Management Software application (SMS).
- **Gordon** employs highly qualified project managers, security experts, electronic, communication and software engineers and Cyber Security experts who put their extensive global expertise into practice for our client's benefit.
- The competitive advantage of Gordon is expressed by a number of unique features achieved during more than 4 decades of operation:
  - ✓ practical experience in the struggle against terror based on actual terror events rather than on theoretical assumptions
  - ✓ vast know-how and expertise gained in similar security projects
  - ✓ integration of operational experience with technical security expertise
- The following tables include the List of Clients in Israel and abroad and a sample of significant security consulting and engineering projects performed by our firm.
- More detailed information about the company can be collected from our website [www.gordonengineers.com](http://www.gordonengineers.com). Recommendations will be submitted upon request.

Sincerely yours,

Eng. J. Gordon  
President
